

# How Managed Cybersecurity Works For Your Business

This is what happens behind the scenes to help protect your business from cyberattacks.

- 1 24/7 Monitoring**  
By a team of experts in a Security Operations Center (SOC).
- 2 Threat Detection and Alerting**  
If a threat is detected, an alert is issued.
- 3 Threat Containment**  
The Security Operations Center contains the threat.
- 4 Guided Remediation**  
The Security Operations Center guides the remediation.
- 5 Back to Business As Usual**  
Return to regular business operations.
